A/UX: AppleTalk Printing Problem (8/94)

Article Created: 9 March 1991
Article Reviewed/Updated: 24 August 1994

TOPIC ---

When I try printing from A/UX to a LaserWriter IINTX connected to an AppleShare
Print Server, I get a message that says that the Laser Prep version is not
correct.

DISCUSSION --

The message you are getting is because the LaserWriter driver and its Laser Prep
in the A/UX /mac/sys/System Folder are different from the one in the AppleShare
Printer Server in the AppleTalk network. Use the same version of LaserWriter
driver and Laser Prep files and/or PrintMonitor as the ones in the Printer
Server.
