A/UX 2.0: How To Turn Off 32-Bit Clean Warning Message

Article Created:13 November 1990
Article Reviewed/Updated: 17 August 1993

TOPIC ---

How do I remove the 32-bit clean warning that appears when I launch an
application? I know A/UX checks a certain bit within the application, but
I don't know which one.

DISCUSSION --

In A/UX 2.0, there are two ways to set the bit:

• From an A/UX CommandShell window, issue the command:

  /mac/bin/changesize +32BitCompatible 'Pathname:Application'

  For example:

  /mac/bin/changesize +32BitCompatible 'MacPartition:MS Word:Microsoft
   Word'

• From A/UX MultiFinder Desktop, open the Macintosh application with the
  ResEdit program, open the SIZE resource, look for the "32 Bit
  Compatible" flag, and set it to 1.
