## A/UX 2.0: In -f Problem (8/94)

Article Created: 27 November 1990

Article Reviewed/Updated: 24 August 1994

TOPIC -----

I have a problem with the `ln -f` command. Logged in as root in console mode, I created a directory `/usr/users`, did an `ln -f /usr /usr/users`, and got a Kernel bus error, `!Double panic: kernel memory management error`, some hex addresses and a crashed file system. I was unable to recover, but a friend's system was okay after restarting and doing an `fsck` from A/UX Startup.

DISCUSSION -----

We have verified the problem. The '`ln -f`' is buggy and has also been found in the A/UX Engineering SPR database.
