AppleShare: A/UX Users Take About Two Minutes to Disconnect

Article Created: 20 April 1991

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

On a network with many workstations running A/UX, I log in to our AppleShare server, do some work, and log off. The window on the server indicates that I'm still logged in. This problem doesn't happen with identical workstation running under Macintosh System 6.0.7.

DISCUSSION -----

This problem happens under both A/UX 2.0 and 2.0.1. User's names are not IMMEDIATELY disconnected from the Connection User List in AppleShare, but they will disappear after about two minutes from log off of an A/UX workstation.
