A/UX: Sorting Large Indexes (9/94)

Article Created: 4 March 1990

Article Reviewed/Updated: 22 September 1994

TOPIC -----

Is there any known A/UX-based software for sorting large indexes (20-40MB)?

DISCUSSION -----

We aren't sure what you mean by "large indexes". A/UX includes the standard "sort" command, which is able to sort lines from one or more files. The maximum number of lines it can sort is limited only by disk space. If your needs go beyond sorting lines, you should investigate a database manager of some sort. Check with Oracle Corporation and Informix Software for information on their products (For more details, search the Tech Info Library under "Oracle" and "Informix.")
