A/UX 3.0.1: Does Not Support Apple Color OneScanner (2/95)

Article Created: 15 June 1993

Article Reviewed/Updated: 17 March 1995

TOPIC -----

Is the Apple Color OneScanner supported under A/UX 3.01?

DISCUSSION -----

According to A/UX Product Management, the A/UX 3.0.1 SCSI driver does NOT work with the Apple Color OneScanner. As of June 1993, we are unaware of the time frame for the driver to work with the Apple Color OneScanner under A/UX 3.0.1.

NOTE: The Apple Color OneScanner is different from the Apple Scanner and Apple OneScanner. The driver included in the A/UX kernel supports the Apple Scanner and Apple OneScanner, but NOT Apple Color OneScanner.

Article Change History:
