o For technical accuracy.

TOPIC -----

Currently, the Macintosh II one-button mouse is the only mouse device available under the A/UX X Window System. Although many X client applications are designed for a three-button mouse, the A/UX X Window System uses the keyboard cursor arrow keys to act as the middle and the right mouse buttons. Following are their equivalents:

Three-button mouse device	Macintosh II equivalents
=====	=====
"Mouse Left" or "Button 1"	Actual Mouse Button
"Mouse Middle" or "Button 2"	Option Key
"Mouse Right" or "Button 3"	Enter Key
"Meta Key"	Command (Open Apple or Cloverleaf) Key
