## A/UX: How To Get Classic Terminal Logon Screen at Launch (8/94)

Article Created: 12 March 1991

Article Reviewed/Updated: 24 August 1994

TOPIC -----

Is it possible to launch A/UX so that a classic terminal logon screen comes up without having to use the Macintosh logon screen?

DISCUSSION -----

Yes, and here's how:

- Modify the /etc/inittab file to have the "co" entry execute a different shell script (for instance /etc/unixlogin below) instead of /etc/loginrc (executes the Macintosh Login)

or

- Make the /mac/bin/Login program nonexecutable or nonexistent by renaming it. The /etc/loginrc shell script checks to see if /mac/bin/Login is executable. If not, it will execute "/etc/getty" instead of /mac/bin/Login.

```
#!/bin/sh
# /etc/unixlogin
/bin/screenrestore
exec /etc/getty console co_9600
```
