A/UX: With StyleWriter or Personal LaserWriter LS (2/94)

Article Created: 13 August 1991

Article Reviewed/Updated: 2 February 1994

TOPIC -----

Does A/UX 3.0.2 support the StyleWriter as an lp device? In other words, can it do something like this:

```
# cat tmp99 | lp0
```

DISCUSSION -----

The StyleWriter or Personal LaserWriter LS works in A/UX via the Chooser and through the Command Shell by selecting what you want printed and selecting "print selection" from the file menu. There is no print cap file available for the printer so you cannot use it as an lp printer. This is per the A/UX 3.0 manual under "Setting Up Accounts and Peripherals for A/UX."

Article Change History:

2 Feb 1994 - Updated for A/UX 3.0.2 and included Personal LaserWriter LS.
