TOPIC --

Can you suggest a good book on TCP/IP from a network administrator's point of
view?

DISCUSSION ---

We don't know of any TCP/IP network administrator-specific books. However,
there are two well-known TCP/IP documents that you might find helpful:
"Introduction to the Internet Protocols" and "Introduction to Administration of
an Internet-based Local Network." They are available from Rutgers University,
Computer Science Facilities Group. Contact them from the internet

Also, the "A/UX Network System Administration" documentation is a good
reference for TCP/IP administration. It includes B-Net (TCP/IP), NFS, Subnet,
Slip, Yellow Pages (client and server), and AppleTalk network issues.
