## **A/UX: Solution to mount:<fileSystem> no such file or directory**

This article last reviewed: 15 October 1990

TOPIC -----

I'm trying to mount a file system and keep getting the error:

```
mount: <file system> no such file or directory
```

DISCUSSION -----

Be sure that the file system you specify really exists.

- 1) Is the file system pathname spelled correctly?
- 2) Is the directory pathname you specified actually there?
