A/UX: Solution to mount: <directory>: Not owner Error

This article last reviewed: 15 October 1990

TOPIC -----

I tried to mount a file system and got the error:

```
mount: <directory>: Not owner
```

DISCUSSION -----

You must be logged in as "root" when mounting partitions.

Enter the line:

```
whoami
```

The output should be: "root". If it isn't, log in as "root" and try the mount again.
