A/UX: Solution to /etc/fstab: No such file or directory Error

This article last reviewed: 15 October 1990

TOPIC --

I tried to mount a file system and got the error:

    /etc/fstab: No such file or directory

DISCUSSION ---

The name of the file system that you are trying to mount does not exist in the file /etc/fstab.

1) Log onto the system as "root".

2) Edit the file /etc/fstab.

3) Add an entry for the file system that you are mounting.
