A/UX: Trivial File Transfer Protocol (TFTP) Supported (9/94)

Article Created: 8 June 1990
Article Reviewed/Updated: 22 September 1994

TOPIC ---

Do any versions of A/UX supports TFTP host and client?

DISCUSSION --

The TFTP (Trivial File Transfer Protocol) is part of the standard Internet
protocols. A/UX B-Net (Berkeley Network) supports most Internet protocols like
TCP, IP, FTP, TFTP, SMTP, ICMP, UDP, and so on.

Yes, the TFTP client and server model have been supported since the first
release of A/UX (1.0). /usr/bin/tftp and /usr/etc/in.tftpd in A/UX are the TFTP
client and server, respectively.
