AFE: Incompatibility with A/UX 2.0

Article Created: 6 September 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy

TOPIC -----

AFE (under A/UX 2.0) fails to initialize DSDD disks as MS-DOS 720K, with the error "Initialization Failed!" The same disks formatted fine on an MS-DOS machine, another Macintosh running AFE, and the same A/UX Macintosh booted under Macintosh OS. The results were the same on several different disks regardless of whether DOS Mounter was running or not.

DISCUSSION -----

AFE isn't completely compatible with A/UX 2.0, although formatting 720K DOS disk was the only problem I found with it. It would mount and translate both 720K and 1.44MB DOS disks with no problems.
