A/UX: How to Monitor NFS Activity (9/94)

Article Created: 15 October 1990
Article Reviewed/Updated: 6 September 1994

TOPIC ---

How can I monitor NFS activity?

DISCUSSION --

The nfsstat command displays or initializes information about the Network File
System (NFS) and Remote Procedure Call (RPC) interface to the kernel. It is a
good way to monitor NFS activity and load.

The nfsstat command executed without any options gives you a complete output,
displaying the NFS, RPC, server and client statistical information.
