## A/UX: TCP/IP Problem Configuration Solved

Article Created: 28 August 1990

### Article Change History

-----  
08/31/92 - REVIEWED  
o For technical accuracy.

### TOPIC -----

We have had a problem with A/UX and TCP/IP lines dropping. The problem configuration was:

```
IP: 192.31.38.69
Broadcast : 255.255.255.0
Netmask : 0
```

### DISCUSSION -----

The resolution to the problem is with the configuration of the /etc/NETADDRS file and the setting for the Broadcast address. The corrected configuration is:

```
IP: 192.31.38.69
Broadcast : 192.31.38.255
Netmask : 255.255.255.0
```

With this modification all line drops will be eliminated.
