A/UX: deferred hostname lookup failure

Article Created: 29 October 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

Often, I get the message in the sendmail queue

deferred hostname lookup failure

when sending mail from a Macintosh to a Sun. Sending from the Sun to a Macintosh always works. The Sun can receive mail from other machines over the same net.

DISCUSSION -----

A nameserver on the network that doesn't have the Macintosh II in its hosts file can cause this problem.
