A/UX: /etc/inittab Defined (9/94)

Article Created: 19 November 1990

Article Reviewed/Updated: 6 September 1994

TOPIC -----

What's /etc/inittab?

DISCUSSION -----

The /etc/inittab file is read by init, the first process started by an A/UX system when it starts up. Init looks at /etc/inittab to see which processes to execute at startup time. Examples include the Macintosh Finder environment with A/UX 3.0, NFS capability, and networking daemons.
