A/UX: Available Removable Cartridge Drives

This article last reviewed: 2 November 1989

TOPIC -----

Is there a removable cartridge drive for use with A/UX?

DISCUSSION -----

We know definitely of two companies that sells a removable cartridge drive that works with A/UX.

Advanced Information Concepts sells a drive called the AIC SlimLine, a 45MB removable hard-disk cartridge system that has A/UX drivers, and SlimLine II, a dual cartridge system.

The AIC Slimline uses the popular Syquest mechanism and cartridges with their own proprietary software. Their optional A/UX compatibility software allows Macintosh OS and A/UX partitions to coexist on a single cartridge.

MicroNet also makes a vast array of drives and tape backups that can be partitioned to run under A/UX or Mac OS.

For more information, search under: "Advanced Information Concepts" and "MicroNet"
