A/UX 1.1: Compatible Cartridge Drives Needed

This article last reviewed: 3 October 1989

QUESTION---

I have a Mass Microsystems 45MB removable hard disk cartridge, which uses a
Syquest 555 drive. I am trying to use it with A/UX 1.1. Unfortunately, all
I'm getting is errors.

RESPONSE---

We have checked with people at Mass Microsystems, and as of August, 1989, their
45MB removable cartridge drive can work only under Macintosh OS. Because the
driver is not compatible with A/UX, someone (third-party developer) needs to
write a special driver for it.

If anyone knows of any removable cartridge drives that work under A/UX, please
