        • For technical accuracy.

TOPIC ---

Will A/UX run on the Northern Telecom Memorybank? Can it access the
Memorybank's tape drive?

DISCUSSION --

Yes, the Northern Telecom Memorybank works with A/UX. Northern Telecom provides
configuration software to prepare their drive for use with the Macintosh OS,
A/UX, or both. They also provide backup software that can do fully-automated
backups to tape under the Macintosh OS and an advanced A/UX driver for their
tape drive for traditional file backups under A/UX. For more information,
search the Technical Info library under "Northern Telecom".
