A/UX: MaxStream Tape Drive

Article Created: 19 March 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

Are you familiar with MaxStream from Archive? Can it be used to back up files only and not partitions from A/UX?

DISCUSSION -----

According to Archive's technical engineering people, the MaxStream backup subsystem provides 60MB and 150MB storage-capacity drives and MaxStream backup software for both Macintosh OS and A/UX. The backup software for both the Macintosh OS and A/UX allows file-by-file and/or partition backups and restoration. The tape medium is the 5.25-inch standard, high-density DC600 tape cartridge. It has backup and restore speeds of up to 6MB per minute.

For more contact information, search the Technical Info library under "Archive Corporation."
