A/UX and SGML (Standard Generalized Makeup Language)

Article Created: 10 January 1991

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

Is there a version of SGML (Standard Generalized Makeup Language) for A/UX 2.0?

DISCUSSION -----

We don't know if SGML runs under A/UX. However, SoftQuad, Inc. does have some software products related to SGML for the Macintosh OS. Their products include:

- SoftQuad RulesBuilder is an Interactive editor for creating SGML DTDs (Document Type Definitions), which, when compiled, also acts as a SoftQuad Author/Editor rules files.
- SoftQuad Author/Editor CALS is a text entry system that provides easy access to the power of structured editing based on SGML, the U.S Government's publishing standard for the Computer-Aided Acquisition and Logistics Support Initiative (CALS).
- SoftQuad Author/Editor is a context-sensitive text entry system that meets the requirements of the Standard Generalized Markup Language (SGML).

For more details, search the Technical Info library under "SoftQuad."
