A/UX: Cannot Start from a CD Drive (8/94)

Article Created: 12 August 1991

Article Reviewed/Updated: 30 August 1994

TOPIC -----

How can I configure my A/UX system so it will start from a CD-ROM drive?

DISCUSSION -----

That is not a supported configuration. There are files that need to be updated when you are running, and they can't be updated on a locked volume such as a CD-ROM. You can, however, use a minimal root partition and mount the rest of the files from the CD-ROM.
