A/UX: /etc/newunix: /etc/uninstall.d/toolbox: not found Error

Article Created: 9 November 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

I got the error: "/etc/newunix: /etc/uninstall.d/toolbox: not found"?

DISCUSSION -----

Enter the command: `ls -d /etc/uninstall.d`

The output should be: `/etc/uninstall.d`

Look for a file named "toolbox" in the directory. If the directory is there, but the file isn't, replace the file toolbox from your system backups.

If the directory is missing, re-create the directory and replace the directories files from your system backups.

- 1) Enter the command: `mkdir /etc/uninstall.d`
 - 2) Enter the command: `chmod 755 /etc/uninstall.d`
 - 3) Enter the command: `chown bin /etc/uninstall.d`
 - 4) Enter the command: `chgrp bin /etc/uninstall.d`
 - 5) Replace the files from your system backups or A/UX distribution disk.
