A/UX: System requests initlevel

Article Created: 11 October 1990

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

Why does the system ask for initlevel when I boot?

DISCUSSION -----

A request for initlevel means the file /etc/inittab was empty. Somehow, you lost its contents. Mount one of the Eschatology partitions and copy the file from there. Remember to unmount the Eschatology partition when you are done. Test your work by rebooting the system. By the way, in A/UX 2.0, Eschatology becomes AutoRecovery.
