A/UX: TextEditor Problem (8/94)

Article Created: 13 June 1991

Article Reviewed/Updated: 29 August 1994

TOPIC -----

I just found a new small bug in A/UX. This bug appears when using TextEditor with an extended keyboard. If you hit the HELP key, an alert appears on the screen. In this alert you can read:

```
Unable to open the help file "MPW.Help".  
#OS error -43 (Error message file not available)
```

DISCUSSION -----

I have verified the problem. It is a TextEditor bug on both A/UX 2.0 and 3.0.
