A/UX: FASYNC And Other Asynchronous Flags Supported (8/94)

Article Created: 13 August 1991
Article Reviewed/Updated: 29 August 1994

TOPIC ---

Is the FASYNC signal supported in A/UX?

DISCUSSION ---

A/UX supports asynchronous signals (such as FASYNC) on sockets. An
asynchronous socket implies that requests will not block.

To receive signals on sockets however, you must do a SIOCSPGRP ioctl call,
or a F_SETOWN fcntl call on the socket that will be receiving signals.
