A/UX: Syslog Doesn't Log su Attempts (8/94)

Article Created: 8 August 1991
Article Reviewed/Updated: 30 August 1994

TOPIC ---

It looks like syslog does not record attempts to su nor failed login attempts.
Syslog does record some events, but it won't record them to a remote host.

DISCUSSION --

Correct. Syslog belongs to Berkeley UNIX, and A/UX to System V. A/UX login,
su, and other programs don't make the calls to syslog, so the messages can't be
recorded. The manual page should be updated to reflect this fact. As it stands
now, the syslogd man page says that login and su generate syslog messages; this
is incorrect.

Logging messages to a remote system is broken, and an SPR has been filed.
