## A/UX: How to Print to a Specific AppleTalk Printer (8/94)

Article Created: 12 August 1991

Article Reviewed/Updated: 30 August 1994

TOPIC -----

How do I print to a named AppleTalk printer instead of taking the default printer from the Chooser?

DISCUSSION -----

See the directions in /usr/spool/lpd/AppleTalk/ofilter. Basically, the steps are:

- 1) Add a new directory with the name of the printer in /usr/spool/lpd
- 2) Create a new named pipe in the new directory
- 3) Copy or link the ifilter and ofilter scripts into the new directory
- 4) Add a new entry to /etc/printcap describing the printer
