A/UX: Changing the Default Editor (9/94)

Article Created: 18 November 1991

Article Reviewed/Updated: 1 September 1994

TOPIC -----

Under A/UX, is it possible to change the default editor from TeachText to something else?

DISCUSSION -----

If you wish to change the default editor, change the environment variable FINDER_EDITOR. You'll need to change this in either the .login file for csh users -- or .profile for korn or bourne shell users.

As an example for C shell users add a new line to the bottom of the .login file as follows:

```
setenv FINDER_EDITOR <editorpathname>
setenv FINDER_EDITOR /mac/bin/TextEdit -for TextEditor
setenv FINDER_EDITOR /usr/bin/vi -for vi"
```

Article Change History:

01 Sep 1994 - Added C shell example.

30 Aug 1994 - Reviewed
