A/UX: How to Assign Function Keys in X11

Article Created: 27 April 1991

Article Change History

08/31/92 - REVIEWED

- For technical accuracy.

TOPIC -----

How do I change the mapping of the keyboard in X11 under A/UX? I want to assign "esc-a" and "esc-d" to the function keys of the extended keyboard, because these keystrokes are cursor movements in the X client application instead of arrow keys.

DISCUSSION -----

The command "xmodmap" let's you see the current mapping of your keys. You can also use this command to modify the mapping of various keys on the keyboard.

To obtain a display of your current settings, enter the command:

```
xmodmap -pk
```

There is a man page for xmodmap that gives you the information necessary for mapping the keys.
