X Windows for A/UX: Where To Get xmh (9/94)

Article Created: 5 March 1991

Article Last Reviewed: 13 September 1994

TOPIC -----

Where I can get a copy of xmh? It is part of the MIT X11R4 Windows distribution, but I have noticed that this item is absent from Apple's X Windows for A/UX product.

DISCUSSION -----

As you may have noticed from the "Getting started with X Window System for A/UX" documentation, only the "display server" and "xstdcmap" client applications are from X11R4. Other client applications, such as the programmer libraries and the X toolkit, are still from X11R3. Since "xmh" is from X11R4 client applications, it is not included in our current release of X Window System for A/UX.

Apple's "X Window System 2.1 for A/UX" product includes xman, but not xmh. xmh requires the "mh" mail handling tools that are not included in either X11 or A/UX.

To locate xmh, connect to ftp.uu.net on the internet.
