A/UX: Purpose of X Windows (9/94)

Article Created: 15 January 1992

Article Reviewed/Updated: 22 September 1994

TOPIC -----

Who would purchase X window system for A/UX?

DISCUSSION -----

People who want to run the X11 native environment on a Macintosh or need to develop X Window System applications should use X Window System for A/UX. It includes X11 Release 4 with libraries, toolkits, and clients for development.

If you need access to X Window System applications, you do not need to purchase X Window System for A/UX. A/UX 3.0 includes MacX and the X Window System display server software.
