## Language Card: Loading Integer BASIC (2/97)

Language Card: Loading Integer BASIC (2/97)

Article Created: 21 September 1984

Article Reviewed/Updated: 12 February 1997

TOPIC -----

This article describes how Integer BASIC is loaded into the Language card.

DISCUSSION -----

When you boot an Apple II with the BASICS diskette or the DOS 3.3 System Master Diskette, Integer BASIC and the Programmer's Aid #1 are loaded into the Language Card. The code between Integer BASIC and the Programmer's Aid #1 (\$D800 - \$DFFF) is loaded with a completely useless part of Applesoft.

This applies to the Apple II and Apple II+.
