\* Jumper blocks should be in position A. Refer to Okidata owners manual for more information on the jumper blocks.

## 92 & 93A Cable

-----  
The 92 & 93A high-speed serial interface may be connected to the Super Serial Card by means of a standard Apple serial cable.

## 92 and 92A Printer Setup

-----  
Set the printer to 9600 baud, 8 data bits and no parity. Check the owners manual for this information.

## Super Serial Card Setup

-----  
Set the Super Serial Card's dip switches as you would for the ImageWriter, except for switch 1-7, which should be set to OFF for secondary clear-to-send.

\* For more information refer to Tech Info Library article "Super Serial Card: Configuring for ImageWriter I".
