Apple IIGS: 03 ROM Upgrade Not Needed by Older Machines

This article last reviewed: 15 July 1990

TOPIC -----

Is there a new revision or ROM upgrade available for the Apple IIGS?

DISCUSSION -----

The current version of the Apple IIGS ROM is 03. We have not offered an upgrade for ROM 01 owners. Most of the changes that came out in version 03 are for the 1MB logic board, hence the new ROM would be of little help to older Apple IIGS owners.
