## Apple IIGS: When One Hard Drive Shows Two Icons

Article Created: 12 April 1991

TOPIC -----

I have an Apple IIGS with 1.25MB RAM, a 3.5-inch floppy drive, 5.25-inch floppy drive, and an HD 20SC hard disk.

I removed all data from the HD 20SC to install System 5.0. Now, I see multiple hard-drive icons. What happened? Should I re-format the disk?

DISCUSSION -----

Most likely, you accidentally created more than one partition. (This may also have happened if the drive was previously used on another operating system, such as the Macintosh OS.)

You need to go back to Advance Disk Utilities and select Partition. Remove all partitions, then create a new one.
