Apple IIe: CP/M with ProFile

MicroSoft CP/M versions 2.26B or 2.28B recognize only the 5-megabyte ProFile, and even then only if the ProFile interface card has the 5-megabyte ROM chip part number 3410271A.

Advanced Logic Systems (ALS) has a version of CP/M that works with the Apple IIe and ProFile: it's called ALS CP/M version 3.01C (ProDOS version). Not only can it access the Profile, it can even be installed under Catalyst. Contact ALS (408/730-0306) for more information.
