TOPIC -----

I'd like to know the PMS (Pantone Matching System) number for the platinum color Apple uses on its products.

DISCUSSION -----

Apple does not normally use PMS color charts or Pantone color numbers to designate the platinum color that is now the company standard. Our platinum color number on a coded PMS chart is somewhere between 420 and 421, somewhat closer to 421. (This depends on the age of the chart and the light source used for viewing it.)
