## Apple IIGS: Using CD-ROM Volumes on AppleShare

Article Created: 13 August 1991

Article Last Updated:

TOPIC -----

I have an Apple IIGS on an AppleShare network with a Macintosh file server. I want to hook up a CD-ROM drive to this network. Is it possible for the Apple IIGS to access the CD-ROM drive? Are there any special drivers that I need to have on the Apple IIGS?

DISCUSSION -----

The Apple IIGS should be able to access the CD-ROM on the AppleShare file server with no additional drivers necessary beyond the standard AppleShare drivers. The CD-ROM will be seen to any workstation as another AppleShare volume.
