Apple IIe Card: Booting Directly Into ProDOS (7/94)

```
Article Created: 05 July 1994

TOPIC -----------------------------------------------------------

With an Apple IIe Card installed in my LC, how do I boot directly into ProDOS in
Apple IIe mode?

DISCUSSION ------------------------------------------------------

If you install the IIe Card software and properly configure everything, then
click on IIe Startup icon, it will go to IIe mode and then check the boot
devices for a suitable startup device.

In order to boot to ProDOS in the IIe mode, double-click the BASIC.SYSTEM icon,
unless you have a ProDOS or DOS 3.3 disk you want to boot to.  This will launch
you directly into ProDOS.
