Apple IIGS: Keeps Dropping Off AppleShare Network (7/94)

Article Created: 14 July 1994

TOPIC -----

I have a AppleShare network, and sometimes after 3 to 5 minutes of idle time, the Apple IIGS computers drop off the network. The AppleShare server reflects that the computers are no longer connected.

DISCUSSION -----

This problem occurs infrequently with GSOS 6.0 and AppleShare 3.x. Here are some possible solutions:

- 1) Reinstall AppleShare and GSOS
- 2) Set the GSOS system speed to fast

if neither of these fix the problem, the only known solution is to use AppleShare 2.x and GSOS 5.0.4
