Apple IIGS: GS/OS 4.0 Incompatible With AppleShare (3/93)

Article Created: 5 December 1988

Article Change History

03/25/93 - REVISED
- To add version number 4.0 because later versions of GS/OS are
  compatible with AppleShare.

TOPIC ---

Apple IIGS system software, GS/OS 4.0, part of Apple IIGS System Software
4.0, is designed for the stand-alone user.

DISCUSSION --

GS/OS 4.0 DOESN'T support the AppleShare File Server; however, GS/OS 4.0
CAN use an AppleTalk printer.

The AppleShare IIGS Workstation Software provides ProDOS 16 from System
Disk 3.2, which allows Apple IIGS access to the AppleShare File Server.

Later versions of GS/OS ARE compatible with AppleShare. Apple highly
recommends upgrading to GS/OS 5.0.4 or later.
