## GS/OS 5.0.2 Solves No Finder Problem

This article last reviewed: 15 January 1990

TOPIC -----

I just updated my server to GS/OS 5.0.1 and created startup disks with no Finder to speed startup. The workstations started up and ran applications, but they don't print. Is there a fix for this problem?

DISCUSSION -----

Installing GS/OS 5.0.2 will resolve the problem encountered with the "No Finder" startup disk.

Note: GS/OS version 5.0.1 is NOT a released version of GS/OS. Copies were sent to the Apple SEs, but it has never been officially released. GS/OS 5.0.2 is the official release of the operating system for the Apple IIGS.
