Article Last Updated:

TOPIC -----

I get a "system error 0027" on my Apple IIGS when I try to launch a certain game. What does it mean?

DISCUSSION -----

Error \$0027 in GS/OS means "File Map Destroyed." If you're seeing this error only when launching a certain program, and all other software works correctly, we would guess the diskette or file is damaged or corrupted. If the software is on a hard drive, you can try reinstalling it.

If the problem persists, consider formatting and possibly replacing the hard drive.
