GS/OS 6.0.1: Desktop Icons Disappear (6/94)

Article Created: 10 Jun 1994

TOPIC -----

I have an Apple IIgs and have just upgraded my GS/OS from 6.0 to GS/OS 6.0.1. Before upgrading, I was able to place frequently used application icons on my desktop and keep them there. Now using GS/OS 6.0.1 when I place my application icons on the Desktop and restart, the icons are gone. How can I retain the application icon placement on the Desktop?

DISCUSSION -----

When using GS/OS 6.0 or 6.0.1 in order to retain icon placement on the Desktop you must select Preferences from the Special menu and place an "x" in the save Finder information onto disk option.
