## AppleWorks 2.0: Page Numbering limit in Footer and Header

While the documentation says that the limit for page numbering is 512 pages, it is actually 256.

You may encounter a situation where a header is numbered from 255 through 256, and the numbering goes on to 257 and further, whereas a footer starts over after page 256 at page 1. This is a problem in either the documentation or the program.
