AppleWorks 2.0: Using the Apple IIGS clock

To use the clock on the Apple IIGS with AppleWorks 2.0, make a backup copy of
your AppleWorks disk and, with your newly made copy:

1. Delete the file "PRODOS" off of the AppleWorks Startup diskette.

2. Copy the file "P8" from the Apple IIGS System disk over to your copy of
   the AppleWorks Startup Disk. The "P8" file is in the subdirectory called
   "SYSTEM" on the Apple IIGS System Disk.

3. Rename the file "P8" to "PRODOS"

4. Startup your new AppleWorks disk to test it.

The date from the Apple IIGS clock should come up automatically now.
